

The Oil and Gas Industry

Wild Desert provides two types of services within the Oil and Gas industry.

Well Servicing

Well servicing rigs or work-over rigs are rigs that complete work on existing wells either in production or recently drilled. The work-over rig will be transported to site (lease) and positioned over the well to either complete the construction of the well ready for production or service the well to assist in the longevity and production life of the well.

Exploration

Exploration rigs are used to determine the types and volumes of petroleum or coal seam gas resources in a specific area. The exploration rig drills a hole into the ground that can sometimes get to depths of 1500m or more. During the drilling process the rig extracts samples of the resources in a process known as coring.

Wild Desert

Wild Desert has three Operational Divisions and two Supportive Divisions that work together to ensure a high level of service for our clients. Wild Desert's operations are spread over a number of regional locations in Queensland, New South Wales and South Australia. Our head office is based in Roma and our corporate office is located in the heart of Brisbane CBD.

Transport

Our Transport Division provides ongoing 24 hour support to our camp and rig operations as well as external clients. Featuring a number of well-maintained and looked after prime movers, trailers and cranes the transport division ensures that all camps, rigs and ancillary equipment are available on site when needed.

Camps

Wild Desert's Camps Division provides our employees with a remote home away from home. Built with comfort and practicality in mind our camps feature modern kitchens, entertainment/media rooms, bathroom facilities as well as a general mess area and a dedicated cook to prepare resort style meals for our employees and clients.

Rigs

Our Rigs provide well servicing and exploration services to some of the largest Petroleum, Oil and Gas companies in the world. Our rigs operate in isolated and remote areas that exhibit harsh and varying weather conditions.

Workshop and Maintenance

Our Workshop and Maintenance Division ensure that our equipment including trucks, trailers, camps, rigs and ancillary equipment are well maintained and available to meet operational requirements. We employ trade professionals with electrical, mechanical, diesel, welding and heavy industry experience.

Office / Corporate

Our office and corporate services provide professional support, leadership and management for our infield operations. Included are functions such as operations/senior management, human resources logistics, purchasing, contracts, legal, business administration and health, safety, environment and quality.

Working on-site at Wild Desert

When working on site the conditions can be quite challenging however working in a team and the camaraderie you can achieve with work mates is very rewarding. Below is a list of conditions you will encounter at Wild Desert:

- Work is completed in isolated and remote locations
- Work will be outside and will be susceptible to varying weather including wet weather, direct sunlight, high temperatures exceeding 50 °C and low temperature reaching below 0 °C
- A standard working day is 12 hours from 6am to 6pm. Night shift will be from 6pm to 6am
- Our working roster cycles are generally 14 days on 14 days off
- Travel to and from the worksite will be provided from Brisbane, Toowoomba and Roma (depending on operational requirements)
- Accommodation and food will be provided whilst on site (all our sites are dry sites – no alcohol is allowed on-site or in our camps)
- The work will be physically demanding, intellectually challenging, dirty and require constant concentration
